

Rain Rain, Don't Go Away

Councilmember Howard J. Tendrich (District 2) checks out a specialized rain barrel provided by the Miami-Dade County Cooperative Extension Service. The display is now available at Palmetto Bay Village Hall for residents to view in advance of a Rain Barrel Lecture & Workshop at the Deering Estate Auditorium on Saturday, July 11 (10 a.m. - noon). Rain barrels are an inexpensive and environmentally friendly way to help reduce pollution and to provide a supply of free non-chlorinated soft water for irrigating your landscape. Learn how to capture and store water by visiting www.miamidade.gov/conservation/rain_barrel.asp or drop by Village Hall, where we're awash in information about this and many other green projects for homes and businesses. Three more workshops will be offered at Deering through November. Call Lize Luna at 305-248-3311, ext. 245, for information.
