

Miami-Dade Water and Sewer Department (WASD) to begin Construction Project in Palmetto Bay

On Monday, August 15th, WASD will begin a Sewer pump station improvement project that requires the installation of an eight-inch force main along Southwest 89th Avenue between Southwest 148th through 156th Streets. The pipe being installed is a force main, which would not allow residents to connect for service.

Hours of construction will take place on weekdays between 7 a.m. and 5 p.m. with the project scheduled to be completed within four months, by mid-December. The construction will require intermittent road closures during the project.

For more information on the project, please call WASD Construction Project Supervisor Nelson Cespedes at 786-268-5171.
