

Miami-Dade Water and Sewer Department Palmetto Bay Water and Sewer Improvement Project

Basin B Construction / Project No. GOB-MISC-8

Project Purpose:

To provide new water and sewer infrastructure to the Basin B area of the Village of Palmetto Bay. These new water and sewer lines will provide needed fire protection and the infrastructure to help facilitate economic development in the Village of Palmetto Bay.

Project Boundary:

Basin B (see map below) is bounded on the north by Banyan Street, on the west by Cleveland Avenue, on the South by SW 181st Terrace and on the east by SW 97th Avenue.

Project Schedule:

The project is expected to commence in December 2009 and be completed by March 2011. Please note that this schedule is subject to change.

Proposed Project Maintenance of Traffic:

During construction it will be necessary to perform lane closures to allow the contractor to safely install the water and sewer mains along northbound and southbound South Dixie Highway. The contractor will only close one lane at a time along South Dixie Highway and the construction will be performed in phases to minimize disruptions. Detours for local roads will be announced ahead of time and be clearly marked. Construction work needed at major intersections will be performed at night to minimize impacts to the traveling public as well as adjacent businesses.

Public Outreach:

The Miami-Dade Water and Sewer Department is committed to minimizing impacts to the traveling public, residents and businesses adjacent to the project corridor. In order to keep the public informed, the Department will conduct a Construction Open House to afford interested individuals the opportunity to view the proposed construction plans as well as speak directly with project personnel. Open House information below:

What: Palmetto Bay Water and Sewer Improvements Basin B Project Construction Open House

When: Wednesday, December 9, 2009
