

Come shape the future of transportation!

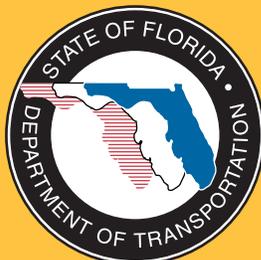

The Florida Department of Transportation is hosting a workshop in your area and we need your input to update the Strategic Intermodal System (SIS) Strategic Plan.

The SIS Plan will focus on airports, seaports, and major roadway connectors – it's a transportation system that maintains the growth of our South Florida economy.

The meeting is open to the public, partners, stakeholders and others with an interest in Florida's transportation system and its importance to our economic prosperity and quality of life.

FDOT wants your comments and feedback!
